

Course Code: CERT – 9101

Certificate in Caregiving of the Elderly & Disability

Programme Objectives

This training programme is designed to assist the participant with appropriate and fundamental skills, knowledge, confidence and attitude to become a professional caregiver at home environment. Eventually, the participant will be able to provide a quality care to older persons after completion of these five essential modules which include:

- **Soft skills**
(i.e. holistic care, emotional support, medication management & communication skill with care recipients)
- **Hard (Technical) skills**
(i.e. transferring skills, diaper changing & pressure ulcer care to older persons etc.)
- **Accidents & Emergencies Responding skills**
(i.e. responding skill to fall incidents, choking incidents, provide correct intervention of abnormal blood pressure or blood sugar level, perform CPR and use of an AED appropriately)

Important to know

This training programme gives flexibility to the participant to select individual module to attend if unable to complete all module within a short period. In another word, the participant may choose one single module to attend first or depend on the participant's own interest or necessary.

However, if participants are able to complete and fulfill the assessment criteria and achieve the result of "Competency" for each module (total 5 different required modules) **within 12 months (start counting from the first module with competent result)**. **Certificate in Caregiving of the Elderly & Disability (Plus AED Program)** will be awarded to those "competent" participants.

Background of Our Trainers

Assisting participants to overcome all challenge in care-giving duties, to maintain & standardize the training quality is very important. All modules will be conducted and assessed by professional trainers and assessors who have vast experienced in clinical, healthcare, first aid training & life - saving technique training, such as:

- Nursing Staff (with 5 years clinical, training & education or related working experiences or above)
- Physiotherapist (with 5 years clinical working experience or above)
- Standard or Occupational First Aid Instructor (Appointed by Accredited Training Provider currently and with 5 years training experience or above)
- Basic Cardiac Life Support (BCLS) and CPR + Automated External Defibrillation (AED) Training Program Chief Instructor or Instructor (Accredited by National Resuscitation Council and with 5 years training experience or above)

Note: Meanwhile, some trainers/assessors have completed ACTA training and with Full Certification qualification.
